

# Spectra IV IP Integration Partners

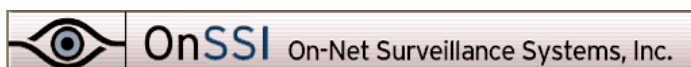

THIS CHANGES EVERYTHING

The response from security companies around the world to the introduction of Spectra IV IP has been overwhelming. And thanks to their integration efforts, Spectra IV IP is being used in conjunction with an ever-growing number of technologies to bring the results that only Spectra can deliver.

Pelco is proud to announce the following Spectra IV IP Integration Partners who are taking advantage of the system's open architecture to take advantage of our industry-leading IP-based camera positioning system.

Don't be left behind. Customers are demanding Spectra IV IP as the centerpiece of every video security application. Become an Integration Partner today. For more information about how, please contact Terry Carver, API Business Development Manager, (800) 292-1981.

### ObjectVideo Inc.

[www.objectvideo.com](http://www.objectvideo.com) | Booth #15097/16103

ObjectVideo intelligent analytics detects a wide range of events and activities to immediately generate alerts or create a searchable repository of stored information. Additionally, ObjectVideo provides robust counting and reporting capabilities for business intelligence purposes.

### Lenel

[www.lenel.com](http://www.lenel.com) | Booth #11063

Lenel is a global leader in the development and delivery of scalable, integrated systems for the commercial security market, with more than 15,000 system installations in 93 countries. Lenel is headquartered in Rochester, N.Y., with sales and support coverage in all major world markets. Lenel is part of UTC Fire and Security.

### Milestone

[www.milestonesys.com](http://www.milestonesys.com) | Booth #4075

Milestone XProtect™ is a suite of open platform IP video management software products. XProtect transforms standard network and computer hardware and IP camera equipment to full featured video surveillance solutions.

### OnSSI

[www.onssi.com](http://www.onssi.com) | Booth #9075

On-Net Surveillance Systems Inc. develops the most advanced non-proprietary, open architecture, Intelligent IP Video Surveillance solutions. OnSSI's systems deliver feature-rich camera management, sophisticated recording and archiving, automatic Push Live Video on event, and the unique NetSwitcher control-room video-wall management solution using the IP Network as a limitless virtual matrix.

### DVTel Inc.

[www.dvtel.com](http://www.dvtel.com) | Booth #8063

DVTel's Latitude NVMS is an open standards, networked-based software platform that replaces the traditional and antiquated CCTV matrix switch, multiplexer and DVR and gives the power of a cutting-edge IP-based physical security solution.

### NICE Systems Inc.

[www.nice.com/nicevision](http://www.nice.com/nicevision) | Booth #12100

A complete, enterprise-class IP video management and recording solution, which offers advanced control room management, open architecture, fail-safe redundancy for 24/7 availability, and integrated content analytics.

### Codestuff

[www.codestuff.net](http://www.codestuff.net)

Codestuff's Rapid Surveillance Suite is a modular multi-platform video management solution. The modules encode, broadcast, record and display video, purchased individually or collectively, creating tailored enterprise video management systems.

### Plustek Inc.

[www.plustek.com](http://www.plustek.com) | Booth #66095

The Plustek NVR4000 is a Distributed Management System with inputs of up to four channels. Using Motion JPEG for complete recording and playback, the NVR4000 also delivers Continuous, Manual and Scheduled recording, Motion Detection as well as Alarm and Pre/Post alarm recording.

### Salient Systems Corporation

[www.salientsys.com](http://www.salientsys.com) | Booth #4000 in with IPUS Magazine

Salient's CompleteView™ 3.0 is an enterprise-level video surveillance and video management system. It works with both analog and IP cameras (or a mix), provides single-seat administration, a robust API, adheres to open architecture and standards, and is easy to install/train/use.

### VisualDefence

[www.visualdefence.com](http://www.visualdefence.com)

VMS® (Virtual Matrix System) is a hybrid Video Management Software Platform that provides a single interface for viewing and interacting with live and recorded video from both analog and IP video sources and any vendor hardware.

### Griffid Ltd.

[www.griffid.com](http://www.griffid.com)

The Griffid Monitoring Station software is a video management application offering organizations the ability to design a video surveillance system. The software is fully camera vendor independent.
